This way is...

- boring,

This way is...

- boring,
- mechanical,

This way is...

- boring,
- mechanical,
- it is hard to make generalisations (at least, on the fly)

Phonology of East Caucasian languages can be presented like this...

Nakh-Daghestanian: Essential background, what's distinctive... (Johanna Nichols)

The N-D phonological signature

Complex consonant inventories. Typically:
3 or more manners. t t' d tt /t/ usually [tʰ]
Uvular, sometimes lateral, sometimes pharyngeal series

Vowel systems vary in size:
3 or 4 vowel qualities: Lak, several Dargwa
5 Avar, most Andic
6-8 most Tsezic, most Lezgian; Nakh
9-10 Kryz, Budukh, Khinalug } ± length, nasalization

Pharyngealization
Epiglottalization vs. true pharyngealization
Segment? syllabic feature? consonant feature? vowel feature?

Syllable structure fairly simple: mostly CVRC

Those ways are...

- To list all inventories
 - boring,
 - mechanical,
 - hard to make generalisations (at least, on the fly)
- To present generalisations
 - restricted to peculiarities,

Those ways are...

- To list all inventories
 - boring,
 - mechanical,
 - hard to make generalisations (at least, on the fly)
- To present generalisations
 - restricted to peculiarities,
 - you need to be a specialist
